

TULSION® MB-115 BG

Mixed Bed Ion Exchange Resin for Production of Ultra Pure Water

TULSION® MB-115 BG is a mixture of strongly acidic black cation exchange resin **TULSION® T-42** in Hydrogen form and strongly basic type I anion exchanger resin **TULSION® A-23** in Hydroxide form in 1:1.5 volume ratio quantities.

TULSION® MB-115 BG is designed for use in the final polishing for production of ultra pure water.

TULSION® MB-115 BG is the ideal choice for electronic industries, which manufacture semi conductors and television tubes, etc where ultra pure water is required. This resin combines high capacity with excellent physical properties.

TYPICAL CHARACTERISTICS – MB- 115(BG)

TULSION T-42 TULSION A-23

Type : Strong acid cation exchange resin Strong base anion exchange

resin

Matrix structure : Polystyrene copolymer

Functional group : Sulphonic acid Quaternary ammonium Type II

Physical form : Moist Spherical Beads

Ionic form: HydrogenHydroxideScreen Size USS (wet):16 to 50Particle size:0.3 to 1.2 mm

Fines content : Less than 0.5% passing through

50 US mesh

Total exchange capacity : 1.8 meg/ml min of 99% in 1.0 meg/ml min of 95% in

Hydrogen form hydroxide form

40° C

Backwash settled density : 710 to 750 g/l

Organic leachable : Less than 0.2 mg KMnO4/ ml of

wet resin

Impurities : Fe not more than 200 ppm
Cu not more than 100 ppm

: Average not less than 500 Avg. not less than 300 g/bead by

g/bead by Chatillion test Chatillion test

pH range : 0 to 14

Solubility : Insoluble in all common solvents

TESTING

Bead strength

Temperature stability (max)

The sampling and testing of ion exchange resins is done as per standard testing procedures, namely ASTMD-2187 and IS-7330, 1998.

PACKING

Super sacks	1000 liters
MS drums	180 liters
HDPE lined bags	25 liters

Super sacks	35 cft
Fiber drums	7 cft
HDPE lined bags	1 cft

For Handling, Safety and Storage requirements please refer to the individual Material Safety Data Sheets available at our offices. The data included herein are based on test information obtained by Thermax Limited. These data are believed to be reliable, but do not imply any warranty or performance guarantee. Tolerances for characteristics are as per BIS/ASTM. We recommend that the user should determine the performance of the product by testing on own processing equipment.
