STENNER PUMP ADVANTAGES

- ▶ Self-priming
- ▶ Can inject off-gassing solutions
- ▶ Simple tube replacement
- ▶ 3 point roller assists anti-siphoning
- ▶ Output reproducibility
- ▶ Output volume not affected by back pressure
- ▶ Tube lubrication not required
- ▶ No vapor lock or loss of prime
- ▶ Foot valve not required to prime

CLASSIC SERIES

Electromechanical | Single or Double Head | Adjustable or Fixed

Quick Facts

CLASSIC 45

- Single head, adjustable or fixed output
- Up to 22.0 gpd @ 100 psi max.
Up to 50.0 gpd @ 25 psi max.
- 26 rpm
- Classic 45 pump item number begins with 45

CLASSIC 85

- Single head, adjustable or fixed output
- Up to 40.0 gpd @ 100 psi max.
Up to 85.0 gpd @ 25 psi max.
- 44 rpm
- Classic 85 pump item number begins with 85

CLASSIC 100

- Double head, adjustable or fixed output
- Up to 20.0 gpd @ 100 psi max.
Up to 100.0 gpd @ 25 psi max.
- 26 rpm
- Classic 100 pump item number begins with 100

CLASSIC 170

- Double head, adjustable or fixed output
- Up to 34.0 gpd @ 100 psi max.
Up to 170.0 gpd @ 25 psi max.
- 44 rpm
- Classic 170 pump item number begins with 170

Features

- Advantages of Stenner peristaltic pumps on page 1
- Tube replacement without tools with patented QuickPro® pump head
- Adjustable models:
 - External adjustable dial ring on feed rate control
 - 20:1 turndown, 2.5% increments
- Single head models:
 - Available as Tank Systems: 7.5, 15, 30 gallon
 - Fixed output pump can be utilized for proportional dosing, refer to pages 56-57
- Components are interchangeable between models
- Tank System ships pre-assembled for quick installations

Versatile and Time-Tested

For over 65 years, the versatile peristaltic Classic Series remains a popular choice with installers. The pump is easy to service or convert to another model. Injection can be directly into the water line. Pump can be activated by a pressure switch or controller.

Weights and Dimensions

Single Head Adjustable

Shipping Weight 9 lbs (3.9 kg)

Box Dimensions

13 x 8 x 10 in. (33 x 20 x 24 cm)

Product Dimensions

Single Head Fixed

Shipping Weight 8 lbs (3.4 kg)

Box Dimensions

13 x 8 x 10 in. (33 x 20 x 24 cm)

Product Dimensions

Double Head Adjustable

Shipping Weight 10 lbs (4.5 kg)

Box Dimensions

18 x 8 x 10 in. (46 x 21 x 25 cm)

Product Dimensions

Double Head Fixed

Shipping Weight 10 lbs (4.1 kg)

Box Dimensions

18 x 8 x 10 in. (46 x 21 x 25 cm)

Product Dimensions

Accessories Shipped with Each Pump

3 Connecting nuts 1/4" & 3 Ferrules 1/4" or 6 mm *Europe*
or 3 Connecting Nuts & 2 Adapters 3/8"

1 Injection Fitting 25 psi (1.7 bar) max.
or 1 Duckbill Check Valve 100 psi (6.9 bar) max.

1 Weighted Suction Line Strainer 1/4", 3/8" or 6 mm *Europe*

20' Suction/Discharge Tubing 1/4" or 3/8", white or UV black
or 20' Suction/Discharge Tubing, white, 6 mm *Europe*

1 Additional Pump Tube

2 Additional Latches

1 Mounting Bracket

1 Manual

NOTE: Double head pumps include another set of accessories listed above.

Specifications

Flow Rate Output Control

Adjustable model: External dial ring

Reproducibility $\pm 2\%$

Maximum Working Pressure

25 psi (1.7 bar), 100 psi (6.9 bar)

Maximum Operating Temperature 125°F (52°C)

Maximum Suction Lift

25 ft (7.6 m) vertical lift, based on water

Motor Type 1/30 HP, shaded pole, class B

Shaft rpm (average maximum) 26 or 44

Duty Cycle Continuous

Maximum Viscosity 1500 Centipoise

Motor Voltage (Amp Draw)

120V 60Hz 1PH (1.7), 220V 60Hz 1PH (0.9),
230V 50Hz 1PH (0.9), 250V 50Hz 1PH (0.9)

Power Cord Type

120V 60Hz, 220V 60Hz: SJTOW
230V 50Hz, 250V 50Hz: H05VV-F

Power Cord Plug End

120V 60Hz NEMA 5-15P, 220V 60Hz NEMA 6-15P,
230V 50Hz CEE7/7, 250V 50Hz CEE7/7

Power Cord Length 6 ft (1.8 m)

Classification Indoor and suitable for Outdoor when
installed with a Stenner Rain Roof part # MP90000

Materials of Construction

All Housings Polycarbonate

Pump Tube Santoprene® (FDA approved) or Versilon®

Check Valve Duckbill

Santoprene® (FDA approved) or Pellethane®

Pump Head Rollers Polyethylene

Roller Bushings Oil impregnated bronze

Suction/Discharge Tubing, Ferrules

Polyethylene (FDA approved)

Tube Fittings, Check Valve Fittings

PVC or Polypropylene (both NSF listed)

Connecting Nuts

PVC or Polypropylene (both NSF listed)

3/8" Adapter PVC or Polypropylene (both NSF listed)

Suction Line Strainer and Cap

PVC or Polypropylene (both NSF listed); ceramic weight

All Fasteners Stainless steel

Pump Head Latches Polypropylene

NOTE: Refer to the chemical guide for material compatibility.

Agency Listings

- IAPMO Listed, conforms to standard NSF/ANS 61 & 372 (excludes any model with a Versilon® tube).

Refer to the chemical guide for material compatibility.

OPTIONAL

To order **Tank System**, insert code before pump item number.

code	Tank System
S7G	7.5-Gallon UV Gray
S7N	7.5-Gallon White
S1G	15-Gallon UV Gray
S1N	15-Gallon White
S3G	30-Gallon UV Gray
S3N	30-Gallon White

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs. To reduce feed rate control wear, select the pump with a maximum flow rate output that most closely matches your application's maximum need.

Refer to the chemical guide for material compatibility.	

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs.

Quick Facts

- Variable speed with multiple modes of operation
- Up to 125.0 gpd @ 100 psi maximum
Up to 315.0 gpd @25 psi maximum
- Totally enclosed housing, NEMA 4X
- Leak detection
- Tube life timer
- Password protection
- Backup pump capability
- Indoor/Outdoor
- 2 year warranty
- S Series pump item number begins with S30, S40, or S50

QuickStart in 5 Steps

1. ENTER pump max. flow rate output
2. CONFIGURE options
3. SELECT mode of operation
4. PROGRAM optional relays
5. RUN pump

Designed for Demanding Applications

The S Series metering pump is designed for demanding applications with a robust totally enclosed housing, built to the NEMA 4X standard. The pump has backup capability to seamlessly transfer operation from the primary to a backup pump when needed. With the OLED display on the control panel and the programmable output relays, an operator can monitor the performance status of the pump. The password protection prevents unauthorized access to the programmed settings.

The pump interfaces with process control systems utilizing a 4-20mA output signal and three programmable output relays. Applications include but are not limited to return wastewater treatment, additive injection in a manufacturing process, liquid biocide injection in cooling towers. Program the pump for your application with the digital keypad. Select from nine modes of operation and several pump status indicators.

Features

- Advantages of Stenner peristaltic pumps on page 1
- Brushless DC motor with ball bearing support
- Switch mode power supply
- Digital keypad with OLED display
- Modbus RTU over RS-485 capable (accessory required)
- Tank System available for quick installations applicable to S30 and S40 models only

9 Modes of Operations

- 4-20mA scalable, invertible
- 0-10VDC scalable, invertible
- Timer 7-day/24-hour
- Pulse
- Hall Effect
- Cycle Timer
- PPM Feed flow switch
- PPM Feed hall effect
- Manual

Pump Status Indicators

The S Series has indicators to communicate the pump status. When a pump condition is recognized it activates either a display alarm on the control panel or an output relay indication or both. There are three programmable relays for output indication from the pump to a control system or to another pump or receptacle.

The chart below shows the pump status and indicators available per mode of operation.

Pump Status	Pump Status Indicators		Modes of Operation
	Display Alarm on control panel	Three Output Relays to pump, system or device	
Tube Change	✓	✓	All Modes of Operation
Tube Leak	✓	✓	
Standby	✓	✓

Features

- Totally enclosed housing, NEMA 4X
- Brushless DC motor with ball bearing support
- Three dedicated output relays
- LED pump status indicators
- Remote start or stop
- Advantages of peristaltic pumps on page 1

Backup Pump Capability

The S420 has back-up pump capability to the primary pump to maintain operation in critical applications. When programmed, the primary pump transfers operation seamlessly to the backup pump.

HOW IT WORKS

The S420 variable speed metering pump injects solution in direct proportion to an incoming 4-20mA analog signal. To achieve the desired flow rate output, the operator scales the pump's response to the signal from 25% to 100% of the maximum flow rate output. The chart on the right illustrates the correlation between the signal received and the pump flow rate output based on the scale setting. When operating in manual mode, the adjustment range is 5% to 100%.

The ability to accept a 4-20mA signal makes the pump well suited for use with water treatment controls including pH and ORP monitors to maintain proper water chemistry and to treat effluent discharge water. Installations can include industrial and municipal waste water treatment facilities and well or surface water treatment for municipalities who supply potable water to residential communities or commercial sites.

LEAK	Blinking red when solution is present in the pump head.
RUN/FAULT	Solid green when pump is operating. Blinking red when pump has a drive fault.
STANDBY	FIXED Solid red, pump is in Standby when contact closure is on the Standby inputs.
STANDBY/OFF	VARIABLE Solid red, pump is in Standby when a contact closure is on the Standby inputs. Blinking red when potentiometer is set to  .

3 Dedicated Relays

LEAK DETECT

- Detects when solution is present in the pump head
- Red LED blinks
- Sends relay to indicate leak is detected
- Option to allow pump to continue to run

RUN

- Solid Green LED
- Sends relay to indicate pump is operating

TRANSFER

Sends relay from primary pump to transfer operation to a backup pump, if there is loss of power, a drive fault or a leak is detected.

S10P

Control Panel

Quick Facts

- Flow activated
- Up to 30 gpd @100 psi max., 10:1 turndown
- 4:1 turndown in PPG mode
- Operating pressure to 100 psi max.
- Leak detection
- Totally enclosed housing
- Indoor/Outdoor
- Control panel with LCD display
- Tube replacement without tools
- 2 year warranty
- Advantages of Stenner peristaltic pumps, pg 1
- S10P pump item number begins with S3P

Features

PUMP STATUS INDICATORS

Prime, Standby, Signal (excludes 10 PPG mode), Leak, Level, Change, Keypad Locked.

PERFORMANCE TIME MODES

Pump Life Hours

Registers the total run hours, not resettable.

Tube Run Hours

Total hours the tube has been in service.

Tube Change Hours

Set the desired hours for tube to run. When hours are exceeded, display flashes CHANGE, as a tube replacement reminder.

LEAK DETECTION

When a leak is detected, the pump stops and the display flashes LEAK. The dedicated relay can indicate to another device.

LEVEL INPUT

Utilized with a fluid level device in the solution tank. At low level, the dry contact is received on the level input, the pump stops and the display flashes LEVEL.

SIGNAL REPEATER

Dedicated relay replicates dry contact to another pump or device, for example, link multiple pumps.

Modes of Operation

AUXILIARY (12-24 VAC/VDC signal)

Runs at set speed while signal is received. Adjustable 10% to 100%, 1% increments.

FLOW SWITCH (dry contact)

Runs at set speed while dry contact from 2-wire flow switch is received. Adjustable 10% to 100%, 1% increments.

SECONDS (dry contact)

Runs at set amount of time for each pulse. Adjustable 0.1 to 60.0 seconds.

10 PPG (dry contact 10 PPG water meter)

Runs at set flow rate output for each pulse. Adjustable 50% to 100%, 5% increments. For process flows from 0.1 to 14.0 GPM. Delivers steady solution distribution.

NOTICE: The information within these charts is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs.

S128 MEDICATOR

1:128 Injection | Leak Detection | Repeater Relay

S128 Medicator

Control Panel

Quick Facts

- 1:128 dosing
- Up to 10.0 oz/min @ 60 psi max.
- Injects into system water flows up to 10 GPM
- 1 or 10 PPG and 1PPL water meter pulse settings
- Leak detection
- Built-in signal repeater
- Tube change timer
- Totally enclosed housing, NEMA 4X
- Indoor/Outdoor
- 2 year warranty
- S128 pump item number begins with S4M

Speed Automatically Adjusts to the System Water Flow Rate

The S128 Medicator is a peristaltic metering pump designed to deliver at a ratio of 1:128; 1 ounce of product into a gallon of process water. The primary application is for injection of solutions commonly used in livestock production, particularly chicken, turkey, ducks and swine.

Activated by a dry contact pulsing water meter, the pump adjusts its speed when the system water flow increases or decreases to continuously maintain an even and proportional injection of product into the water line. The pump injects into system water flow rates up to 10 gallons per minute. The flow rate output capacity is up to 10 ounces per minute with pressures up to 60 psi.

The three pulse rate settings are the most common water meter pulse rates of 1 & 10 pulses per gallon and 1 pulse per liter. There are four LED pump status indicators on the control panel for Leak/Fault, Overrun, Change/Level and Power/Standby.

The adjustable potentiometer has prime, each pulse setting, reset tube timer and  (standby).

The leak detect feature can be set to stop the pump or let it continue to run when a leak is detected. The tube change timer can be set with the number of desired hours for the pump to run before the change/level LED is activated. The built-in signal repeater allows the existing water meter to register its totalizing volume to an environmental controller.

The S128 Medicator is equipped with highly chemical resistant components, 3/8" suction and discharge tubing and a durable ball and spring check valve.

Features

- Advantages of Stenner peristaltic pumps on page 1
- Tube replacement without tools
- Automatically adjusts speed to evenly distribute product
- Proportional injection especially at low flow rates
- Remote start & stop capability using house controller
- LED pump status indicators
- Output relays
- Standby setting

ECON STENNICATOR

Potentiometer

ECON STENNICATOR Meter Systems - Single and Dual

ECON Tank System

[Watch Animated Video](#)
Econ Stennicator
on a Poultry Farm
www.stenner.com

Quick Facts

- 1:128 Injection
- Up to 2.7 oz/min @ 80 psi max.
- 1, 10 PPG or 1 PPL water meter pulse settings
- Repeater relay
- Standby setting
- Econ Stennicator pump item number begins with E20M

Compact and Water Meter Activated

The Econ Stennicator injects solution at a fixed ratio of 1:128. The pulse from the water meter activates the pump at a fixed run time to deliver the proper dosage. The pump has three pulse settings, adjustable with a potentiometer, to accommodate 1 or 10 pulses per gallon or 1 pulse per liter. The pump's relay repeats the incoming meter signal to another Stennicator, controller or device. Additional features include an on/off switch, prime and a standby setting.

Not a Traditional Medicator for Livestock Water

The Stennicator, Stenner's peristaltic medicator, is not a typical 1:128 water driven proportional pump. The pump injects directly into the water line eliminating a water bypass that can restrict water flow to the drinker lines. Poor water quality, scale and solids are not harmful to the pump. The Stennicator is compact with a small footprint and can adapt to an existing pulse water meter. If utilizing a house controller, the pump's relay allows the water meter to send the signal to the controller to register the water consumption. The pump can accurately inject or be placed in standby, without interrupting the water meter signal.

Stennicator Meter System or Tank System

For convenient and quick installations or turnkey operations, the Stennicator Meter System is equipped with the pump and corresponding dry contact 3/4" or 1" water meter mounted on a heavy duty panel.

The pre-assembled Tank System is equipped with the pump mounted to a 7.5, 15 or 30 gallon capacity tank. Select UV Gray for outdoor installations or translucent white.

Features

- Advantages of Stenner peristaltic pumps on page 1
- Tube replacement without tools
- Activate multiple pumps from one meter
- No water restriction or pressure loss
- On/off switch
- Brushless motor
- Enclosed housing
- Indoor/Outdoor

NOTICE: The information within this chart is solely intended for use as a guide. The output data is an approximation based on pumping water under a controlled testing environment. Many variables can affect the output of the pump. Stenner Pump Company recommends that all metering pumps undergo field calibration by means of analytical testing to confirm their outputs.

ECON INTEGRATOR™

Control Panel

ECON INTEGRATOR™ Meter System

ECON Tank System

Three Operating Modes

SECONDS: The pump can accept a dry (non-voltage) contact signal and will run for a set **time** in response to receiving the signal. There are five pump operating time ranges; the maximum time is displayed on the control panel. The run time is adjustable from 10% to 100% in 1% increments.

1 second = 0.1-1.0 5 seconds = 0.5-5.0 10 seconds = 1.0-10.0
20 seconds = 2.0-20.0 60 seconds = 6.0-60.0

FLOW SWITCH: The pump can accept a dry (non-voltage) contact signal from a 2 wire flow switch and will run at the set **speed** as long as it receives the dry contact. The pump speed is adjustable from 10% to 100% in 1% increments.

AUXILIARY: The pump can accept a 12-24 VAC/VDC signal from control equipment that responds to flow and will run at a set **speed** for as long as it receives the signal. The pump speed is adjustable from 10% to 100% in 1% increments. The repeater relay does not work with a 12-24 VAC/VDC signal.

Quick Facts

- Flow activated with internal repeater relay
- Up to 30.0 gpd @ 80 psi max.
- 10:1 turndown, 1% increments
- Digital keypad with LCD display
- Econ Integrator™ pump item number begins with E10R or E20R

Proportional Pump with Repeater Relay

The Econ Integrator™ is a flow activated peristaltic pump featuring three operational modes and a repeater relay. The relay provides a dry contact output signal replicating the signal the pump receives. The signal output can control another device that accepts a dry contact signal such as another Econ Integrator™. Multiple pumps can be activated by one water meter. The relay is operable in the Seconds or Flow Switch mode.

In livestock operations, the relay is especially useful when an existing water meter is utilized to tally water consumption to a controller. The relay allows the meter to send a signal to the pump and to the controller; eliminating the need for another meter. The signal can be sent if the pump is operating or in standby.

Econ Integrator™ Meter System or Tank System

For convenient and quick installations or turnkey operations, the Econ Integrator™ Meter System is equipped with the pump and corresponding dry contact 3/4" or 1" water meter mounted on a heavy duty panel.

The pre-assembled Tank System is equipped with the pump mounted to a 7.5, 15 or 30 gallon capacity tank. Select UV Gray for outdoor installations or translucent white.

Features

- Advantages of Stenner peristaltic pumps on page 1
- Tube replacement without tools
- Patented quick release pump head
- Enclosed housing
- Indoor/Outdoor
- Wall mountable
- Optional mounting accessories available

Quick Facts

- Up to 50.7 oz/hr @ 80 psi. max.
- Adjustable potentiometer
- 50:1 turndown
- Econ LD pump item number begin with E10H

Features

- Advantages of Stenner peristaltic pumps on page 1
- Patented quick release pump head
- Tube replacement without tools
- Brushless motor
- Enclosed housing
- Indoor/Outdoor
- Optional mounting accessories available
- Tank System ships with pump pre-mounted to tank

Accurate Low Volume Metering

The Econ LD is a precise, compact variable speed peristaltic pump designed for metering low volumes when reliability and accuracy are a must. Ideal for pumping flocculants, coagulants, sanitizers, and a variety of solutions. The quiet, long lasting brushless motor, in a totally enclosed housing, offers premium quality in a compact pump.

The design incorporates the latest microprocessor technology with a simple potentiometer control and on/off switch. The potentiometer has a 50:1 turndown offering a wide range of outputs. Adjusting the potentiometer clockwise gradually increases the pump speed to 100%. Turning the potentiometer fully counterclockwise turns the pump off.

ECON FP

Control Panel

ECON FP Meter System

ECON Tank System

Quick Facts

- Flow activated
- Up to 30 gpd @ 80 psi max.
- Digital keypad with LCD display
- 10:1 turndown, 1% increments
- Econ FP pump item number begins with E10P or E20P

Flow Activated

The Econ FP is a flow activated peristaltic pump with three modes of operation. Based on the mode of operation selected, the pump runs at a set time or a set speed in response to receiving a signal. The control panel displays one of three operating modes: Seconds, Flow Switch or Auxiliary. The pump is designed for light duty applications such as drinking water disinfection or pH adjustment for private water wells in homes or farms.

Econ FP Meter System or Tank System

For convenient and quick installations or turnkey operations, the Econ FP Meter System is equipped with the pump and corresponding dry contact 3/4" or 1" water meter mounted on a heavy duty panel.

The pre-assembled Tank System is equipped with the pump mounted to a 7.5, 15 or 30 gallon capacity tank. Select UV Gray for outdoor installations or translucent white.

Three Operating Modes

SECONDS: The pump can accept a dry (non-voltage) contact signal and will run for a set **time** in response to receiving the signal. There are five pump operating time ranges; the maximum time is displayed on the control panel. The run time is adjustable from 10% to 100% in 1% increments.

1 second = 0.1-1.0 5 seconds = 0.5-5.0 10 seconds = 1.0-10.0
20 seconds = 2.0-20.0 60 seconds = 6.0-60.0

FLOW SWITCH: The pump can accept a dry (non-voltage) contact signal from a 2 wire flow switch and will run at the set **speed** as long as it receives the dry contact. The pump speed is adjustable from 10% to 100% in 1% increments.

AUXILIARY: The pump can accept a 12-24 VAC/VDC signal from control equipment that responds to flow and will run at a set **speed** for as long as it receives the signal. The pump speed is adjustable from 10% to 100% in 1% increments.

Features

- Advantages of Stenner peristaltic pumps on page 1
- Patented quick release pump head
- Tube replacement without tools
- Enclosed housing
- Wall mountable
- Indoor/Outdoor
- Optional mounting accessories

Reliable Accurate Metering

Both the Econ VX and FX are peristaltic pumps designed with a totally enclosed brushed motor for light duty or general intermittent applications. The pumps work well for fluid transfer, sampling or injecting a variety of solutions for swimming pools, food & beverage, metal finishing, irrigation and horticulture and more.

The pumps are wall mountable or select one of the optional mounting accessories. The Econ VX or FX is offered as a Tank System; the pump is shipped pre-mounted to a 7.5, 15 or 30 gallon solution tank. The pumps are cULus for indoor and outdoor use; CE IP44 is also available.

ECON T TANK SYSTEM

Features

- Timed injection
- Digital control pad with LCD display
- Programmable 24 hour clock
- Enclosed housing
- Wall mountable
- Patented quick release pump head
- Tube replacement without tools
- Advantages of Stenner peristaltic pumps on page 1

Automatic Dosing Control for Timed Applications

The Econ T and TD pumps provide automatic injection and offer flexibility to program a customized dosing schedule for light duty applications. Program up to 24 independent On and Off events within a 7 day period. Each event can be set for a specific On and Off time for each selected day or days of the

week. The timer is programmed in hour and minutes increments. A battery is included as back-up to power loss to maintain the time and programmed events.

Quick Facts

ECON T

- Up to 1.92 oz/min @ 80 psi max.
Up to 1.33 oz/min @ 25 psi max.
- Indoor/Outdoor
- Santoprene® pump tube
- Optional mounting accessories
- Available as a Tank System

ECON TD Electric

ECON TD Battery-Powered

ECON TIMER SERIES

Applications

ECON T

- Biocide feed for Legionella prevention in small cooling towers
- Sanitation for water fountains
- Injection of liquid solar blankets or enzymes for commercial pools
- Injection for scale and algae control in poultry evaporative cool cells
- Disinfection of poultry hatchery dip tanks

ECON TD

The Econ TD pumps are an extension of the Econ T programmable timer series designed for 5 psi or less. Timed applications such as commercial drain line maintenance, grease trap treatment or odor control installations are some of the possibilities. Unlike the Econ T, both TD pumps offer an FKM tube for d-Limonene. The Econ TD battery-powered pump offers a silicone pump tube option and is the only pump in the Econ line with a blue roller assembly.

OEM

Stenner's custom OEM pump can be designed with the customer's supplied motor and gearbox. A standard OEM bracket is provided, or a custom bracket can be designed. The pump is offered with a brushless or brushed DC motor, and as an open or enclosed version.

Enclosed versions offer an optional internal power supply and customizable power cord for 100-240VAC, 50/60Hz. The customer selects the fixed output from ranges of 0.04 ounces per hour to 2.08 gallons per hour, up to 80 psi maximum (1.3 milliliters per hour to 7.88 liters per hour, up to 5.5 bar maximum).

OEM BATCH

On/Off Switch

The custom OEM batch pump is factory programmed to run a specific length of time when manually activated by an integral switch or can be designed to activate with an input signal. The customer selects the pump run time from 0.1 seconds to 24 hours per activations.

The pre-set fluid volume choices are up to 50 gallons per day, up to 80 psi maximum (189.3 liters per day, up to 5.5 bar maximum). The pump is supplied with a 24VDC brushless motor and a customizable power cord for 100-240VAC, 50/60Hz. The pump can also be supplied without an internal power supply.

Quick Facts

- Up to 8.1 oz/min @ 80 psi max.
- Adjustable potentiometer
- Select custom color
- Optional tube materials
- Dual bearing support output shaft
- Serviceable liquid end, gear train & motor
- Agency approvals available
- Voltage options

ECON VACCINATOR™

Quick Facts

- Inject 1 gallon consistently over 6 hours
- Built-in timer automatically shut off pump
- Simple installation
- Inject directly into water lines
- Eliminates pre-measured stock solutions

Reliable Accurate Delivery

The Vaccinator delivers 1 gallon of a liquid oral vaccine into the water line consistently over 6 hours.

Injection is directly into the water line, unlike proportioners which require a water bypass.

Direct injection assures accurate dosages to the entire herd and eliminates the need to pre-measure stock solutions, reducing labor costs.

Features

- Patented quick release pump head
- Tube replacement without tools
- Enclosed housing
- On/Off Potentiometer
- Wall mountable
- Indoor/Outdoor
- Optional mounting accessories
- Advantages of Stenner peristaltic pumps on page 1

How It Works

Tank Systems are available for the Classic Series single head pumps, the S Series pumps, and the Econ pump line. Most Tank Systems consist of the tank and pump shipped pre-assembled to save time on installation. The Tank System for the S Series is shipped with the pump boxed separately within the tank box to protect it during shipping. The S Series pump will easily slide onto the pre-installed mounting bracket on the tank.

Features

- Pump is vertically mounted for solution containment
- Child resistant lid
- Polyethylene construction is lightweight and rugged

- Rain Roof (Classic Series only)
- Vertical mount over containment basin
- Child Resistant Lid
- Level Indicators

Proportional Injection System

Proportional Metering in a Pre-Assembled System

The Proportional Injection System injects solution in proportion to the system's flow rate based on water volume. The water meter sends a signal to the PCM which actuates the pump. Components are pre-mounted to a heavy duty panel for quick installation and convenient equipment accessibility.

The system is suited for constant pressure (variable speed) well pumps, poultry and livestock houses, irrigation, systems with demand based backup wells and any application with varying flow rates.

Components

- 1 Classic Series Single Head Fixed Output Pump
- 2 PCM
- 3 Plastic 3/4" dry contact water meter, certified by the Water Quality Association to ANSI/NSF 372, low lead
- 4 Flow Indicator to confirm pump is operating
- 5 Filter with 30 and 100 mesh screens
- 6 Unions for easy installation and removal
- 7 Cabinet keeps cords and wires contained
- 8 Heavy duty panel and wall mounting bracket

How It Works

The PCM is a time adjustable controller utilized with the Classic Series Single Head Fixed Output Pump and a pulsing dry contact water meter for applications requiring proportional injection. The water meter sends a signal to the PCM and the PCM actuates the pump to deliver the desired dose based on water volume. The PCM is a component in Stenner's Proportional Injection System.

Features

- Chemical resistant ABS plastic housing
- On-time duration set with knob adjustment with locking feature
- 10' power cord and jacketed signal input cable

Do It Yourself Proportional Feed

Purchase a Classic Series Single Head Fixed Output Pump, a PCM and water meter to create your own proportional feed installation.

Interchangeable Operating Range Settings

The PCM's operating range can be converted by changing the position of the jumpers on the circuit board so another model doesn't have to be purchased.

NPT Thread: 2.0 in. (5.1 cm)

STAINLESS STEEL WATER METER

SIZE	PULSE PER GALLON	ITEM NUMBER
2"	1 pulse/gallon	SSMRS20-1PPG
2"	2 pulses/gallon	SSMRS20-2PPG
2"	4 pulses/gallon	SSMRS20-4PPG

NOTE: Two week lead time for non-stocked meters. Contact factory to confirm availability.

WATER METER

Vertical Positive Displacement

VPD Water Meter

Flow Rates

Continuous Flow* 16 gallons per minute

Flow Range 0.1-22 gallons per minute

* The size of the meter should be based upon continuous flow and gallons per minute as opposed to pipe size.

Specifications

Accuracy $\pm 2\%$ of maximum flow when operating between minimum and maximum flow range

Maximum Operating Pressure 150 psi (10.3 bar)

Temperature Range 35-122°F (1.7-50°C)

Protect the meter from freezing

Maximum Current 20mA

Maximum Voltage 24VDC or 24VAC

Sensor Reed switch, dry contact type, normally open

Cable Length 6 ft (1.8 m)

Register US gallons or liters

Materials of Construction

Body Engineered reinforced plastic (nylon)

Internal Engineered thermoplastic

How It Works

The vertical positive displacement, oscillating piston, water meter doesn't require power and utilizes a reed switch to provide a pulsing dry contact signal. Although designed for vertical installation, the meter can be installed horizontally or on an incline, provided the meter remains full of water. The meter has a built-in back flow preventer and is housed in an engineered plastic with corrosion resistant liquid-sealed register for easy reading.

Weights and Dimensions

Shipping Weight 1.8 lbs (0.8 kg)

Box Dimensions 13 x 10 x 9 in. (33 x 25 x 23 cm)

Product Dimensions

Body: 6.5 in. (16.51 cm)

Body with Couplings: 10.5 in. (26.67 cm)

IPS Thread: 1.0 in. (2.54 cm)

NPT Thread: 0.75 in. (1.9 cm)

VERTICAL POSITIVE DISPLACEMENT WATER METER

SIZE	PULSE PER GALLON	ITEM NUMBER
3/4"	1 pulse/gallon	VPD0750-1PPG
3/4"	1 pulse/liter	VPD0750-1PPL

NOTE: Two week lead time for non-stocked meters. Contact factory to confirm availability.

FLOW SWITCH

Two Wire | Dry Contact

Specifications

Switching Function Contact closes at increasing flow, opens at decreasing flow

Pressure Rating Maximum 145 psi*

Medium Temperature Maximum +212°F* (+100°C)

Ambient Temperature Maximum +158°F* (+70°C)

Protection Class IP 65

Switching Current Maximum 1A

Switching Voltage Maximum 230VAC, 48VDC

Switching Capacity Maximum 26VA, 20W

Materials of Construction

Body/Paddle System PPO Noryl GFN3

Adapter

PVC: Glue-in

Copper: Brass, soldering

Gasket EPDM

Magnet Hard Ferrite

Cable PVC

* Values for flow switch, observe maximum values of PVC slip fit tee or maximum values of copper pipe.

How It Works

In residential or light commercial applications, water treatment professionals can use a metering pump activated by a flow switch for applications such as disinfection, oxidation or pH adjustment. Stenner offers a dry contact, two wire flow switch for a PVC tee or copper pipe. Both are a paddle style with glass fiber reinforced plastic construction. The design uses a magnetic force to reset the paddle to eliminate spring fatigue. Stenner's Econ FP or Econ Integrator™ pumps are designed to interface with a two wire flow switch that accepts a dry contact.

Features

The flow switch for PVC includes a glue-in adapter for easy mounting to a standard PVC slip fit tee. The flow switch for copper has an adapter for soldering to copper pipe. The nominal activation points are based on installation into a Spears 3/4" or 1" schedule 80 PVC tee or an industry standard, smooth 3/4" or 1" copper pipe. The activation points are 1.2 gallons per minute for 3/4" and 1.9 gallons per minute for the 1" flow switch. A wiring harness is included with the Econ FP and the Econ Integrator™ for an easy connection to the dry contact flow switch.

FLOW SWITCH

DESCRIPTION	ITEM NUMBER
3/4" for PVC pipe	EC500
1" for PVC pipe	EC501
3/4" for copper pipe	EC50C
1" for copper pipe	EC51C

PUMP TUBES

1/4" UV black 20' Suction/Discharge Tubing	EA	AK4002B		All Pumps EXCLUDING S40, S4F, S4V, S44, S4M, S50
1/4" UV black 100' Suction/Discharge Tubing	EA	AK4010B		All Pumps EXCLUDING S40, S4F, S4V, S44, S4M, S50
1/4" UV black 1000' Suction/Discharge Tubing	EA	AK4100B		All Pumps EXCLUDING S40, S4F, S4V, S44, S4M, S50
1/4" white 20' Suction/Discharge Tubing	EA	AK4002W		All Pumps EXCLUDING S40, S4F, S4V, S44, S4M, S50
1/4" white 100' Suction/Discharge Tubing	EA	AK4010W		All Pumps EXCLUDING S40, S4F, S4V, S44, S4M, S50
1/4" white 1000' Suction/Discharge Tubing	EA	AK4100W		All Pumps EXCLUDING S40, S4F, S4V, S44, S4M, S50
6 mm white 20' Suction/Discharge Tubing	EA		AK20W6M	All Pumps EXCLUDING S40, S4F, S4V, S44, S4M, S50
3/8" UV black 20' Suction/Discharge Tubing	EA	MALT02B		All Pumps
3/8" UV black 100' Suction/Discharge Tubing	EA	MALT10B		All Pumps
3/8" UV black 1000' Suction/Discharge Tubing	EA	MALTB10		All Pumps
3/8" white 20' Suction/Discharge Tubing	EA	MALT002		All Pumps
3/8" white 100' Suction/Discharge Tubing	EA	MALT010		All Pumps
3/8" white 1000' Suction/Discharge Tubing	EA	MALT100		All Pumps
3/4" Plastic Couplings with gaskets	2-PK	JLP38009P		Works with 3/4" Plastic Water Meter
1" Plastic Couplings with gaskets	2-PK	JLP38012P		Works with 1" Plastic Water Meter
1/8" Rubber Gaskets	2-PK	JLP38007R		Works with 3/4" Plastic Water Meter
1/8" Rubber Gaskets	2-PK	JLP38012R		Works with 1" Plastic Water Meter
Single Reed Switch with screw	EA	JLP32RS		Works with 1PPG, 4PPG, 10PPG Plastic or Stainless Steel Water Meter
Dual Reed Switch with screw	EA	JLP34RS		Works with 2PPG Plastic or Stainless Steel Water Meter

CHEMICAL RESISTANCE GUIDE

Ratings Key – Chemical Effect

- A** Fluid has minor or no effects
- B** Fluid has minor to moderate effects
- C** Fluid has severe effects
- No data available

CAUTION

The information is provided ONLY as a guide to assist in determining chemical compatibility for wetted components. Testing under the specific conditions of the application is recommended. Stenner Pump Company assumes no responsibility for its accuracy. Outside factors including but not limited to temperature, pressure, mechanical stress, and solution concentration can affect material compatibility in a particular application. Stenner makes no warranty, expressed or implied, as to the accuracy of this guide or any materials' suitability for fitness or purpose for any application. User assumes all risk and liability for use of this guide.

POLICIES

Limited Warranty

Stenner Pump Company will for a period of one (1) or two (2) years from the date of purchase (proof of purchase required) repair or replace – at our option, all defective parts. Stenner is not responsible for any removal or installation costs. Pump tube assemblies and rubber components are considered perishable and are not covered in this warranty. Pump tube will be replaced each time a pump is in for service, unless otherwise specified. The cost of the pump tube replacement will be the responsibility of the customer. Stenner will incur shipping costs for warranty products shipped from our factory in Jacksonville, Florida. Any tampering with major components, chemical damage, faulty wiring, weather conditions, water damage, power surges, or products not used with reasonable care and maintained in accordance with the instructions will void the warranty. Stenner limits its liability solely to the cost of the original product. We make no other warranty expressed or implied.

Returns

Stenner offers a 30-day return policy on factory direct purchases. Except as otherwise provided, no merchandise will be accepted for return after 30 days from purchase. To return merchandise at any time, call Stenner at 800.683.2378 for a Return Merchandise Authorization (RMA) number. A 15% restocking fee will be applied. Include a copy of your invoice or packing slip with your return.

Problem with Shipment

Check orders immediately upon arrival. Any claim of damage, shortage or order discrepancy must be noted on the delivery receipt and reported to Stenner at 800.683.2378 within seven (7) days of receipt.

Pump Service & Repairs

Before returning a pump for warranty or repair, remove chemical from pump tube by running water through the tube, and then run the pump dry. Following expiration of the warranty period, Stenner Pump Company will clean and overhaul any Stenner metering pump for a minimum labor charge plus necessary replacement parts and shipping. All metering pumps received for overhaul will be restored to their original condition. The customer will be charged for missing parts unless specific instructions are given. To return merchandise for repair, call Stenner at 800.683.2378 or 904.641.1666 for a Return Merchandise Authorization (RMA) number.

Disclaimer

This information is not intended for specific application purposes. Stenner Pump Company reserves the right to make changes to prices, products, and specifications at any time without prior notice.
